

Structural Mechanics Course for students from École des Mines, Ales

Project report - Typical introduction and executive summary

Typical Introduction

This report is in response to the project brief in the course document at: (link)

The style used meets the specification at:

<http://www.imacleod.com/UsingStructM/report-style.pdf>

Typical Executive Summary

The results of the investigation show that:

1. The following changes should be made to the model:.....
2. There appears to be some inaccuracy in setting up the model. The low correlation between the checking model and the analysis model needs to be resolved.
3. The sensitivity analysis shows that:
4. The sizes of the members of the frame should be increased (or decreased).

or:

1. The validation analysis indicates that the model is acceptable.
2. The verification did not show any errors.
3. The sensitivity analysis shows that:
4. The sizes of the members of the frame appear to be satisfactory.
